Archivo App.js

```
1 import react from 'react';
2 import {View, StyleSheet, Image, Text, ScrollView, Modal, Button, TouchableHighlight} from 'react-native';
3 import {useState} from 'react';
4
5 const App = () => {
6   const [modalVisibleplaya, setModalVisibleplaya] = useState(false);
7   return(
8     <>
9     <ScrollView>
10
11       <Modal transparent={true} animationType='slide' visible={modalVisibleplaya} onRequestClose={() => {
12         alert('Modal has been closed');
13       }}>
14         <View style={styles.vistaModal}>
15           <View style={styles.modal}>
16             <Text style={styles.subtitulo}>Ir a la playa</Text>
17             <Text>El Salvador cuenta con hermosas playas a nivel Centroamerica</Text>
18             <Button title='Cerrar' onPress={() => {setModalVisibleplaya(!modalVisibleplaya)}} />
19           </View>
20         </View>
21       </Modal>
22
23       <View style={{flexDirection: 'row'}}>
24         <Image
25           style={styles.banner}
26           source={require('./components/img/bg.jpg')}
27         />
28       </View>
29       <View style={styles.contenedor}>
30         <Text style={styles.titulo}>Que hacer en El Salvador</Text>
```

## Funcionamiento

Que hacer en El Salvador
